PROJECTS & EXPERIENCE

Sponsorship Project (<https://www.vaikunthaenergies.com>)

- Developed and deployed the corporate website for **Vaikuntha Energies**, creating a responsive and modern web experience to strengthen the company's digital presence and brand visibility.
- Implemented optimized frontend design using modern web technologies, improving user experience, accessibility, and cross-device performance.**

XAUUSD Quant Research Platform

- Built a full-stack quantitative trading research platform for XAUUSD strategy analysis, and risk evaluation using **Python, FastAPI, and React**.
- Developed **Monte Carlo simulation** and **advanced risk analytics** modules including VaR, CVaR, and real-time performance dashboards for strategy robustness testing.

Web Development

- Portfolio Website using **React (Vite) + JS** posted on GitHub pages.

Independent Crypto Market Research

- Developed **2 years of hands-on experience** in Crypto Market Analysis through trading simulations, challenge accounts and competitive trading environments.
- Applied **Risk Management and Technical Analysis** throughout the Journey.

Lagging and Leading Sectors

- Built an automated Python-based macro-equity sector rotation tracker analysing institutional capital flow across **NIFTY50, NIFTY IT, NIFTY AUTO, NIFTY PHARMA and NIFTY BANK** using **normalized growth and relative strength analysis**.
- Developed data pipelines with **Python, Pandas, and Yahoo Finance API** to identify leading and lagging market sectors through **50-day relative strength smoothing** and financial visualization dashboards.
